Storyboard and Sketches

Here are my storyboards for my project:

Storyboard 3:

Tim (moderately familiar with comics) has found his way to the Marvel Comics Timeline Explorer and wants to search for a specific character. He clicks on filter to filter events by whether they feature "Wolverine".

Caption: "I forget how many stories Wolverine has been in, so let's see!"

Storyboard 4:

After seeing all the stories highlighted where "Wolverine" is involved, Tim decides to click on the "Civil War" event to see what other characters are involved.

Caption: "Who takes part in 'Civil War'? Let me find out! Oh, Captain America plays a crucial role!"

Storyboard 5: Steven Carr

Sara (veteran comic reader) has arrived to the Marvel comics timeline explorer and wants to track the chronology of the "Fantastic 4". She filters the group and views each node one at a time.

Caption: "Oh, I can filter by character OR group! Let me start with 'Fantastic 4'."

Storyboard 6:

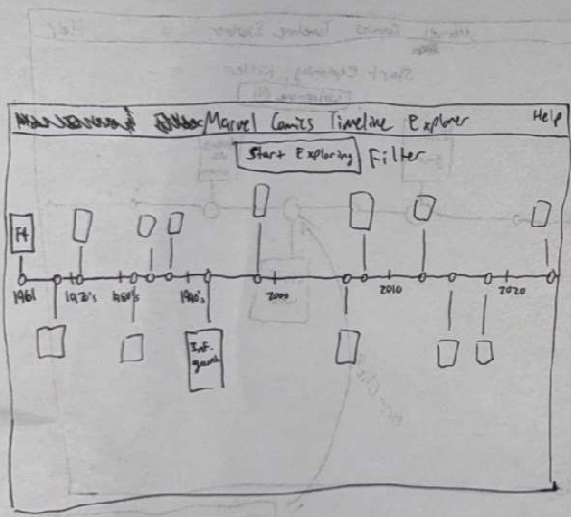

Sara is done browsing the timeline for now, and presses the "X" in the upper-right corner of the summary window to return back to the main timeline.

Caption: "This has so much good information, but I've had enough for now."

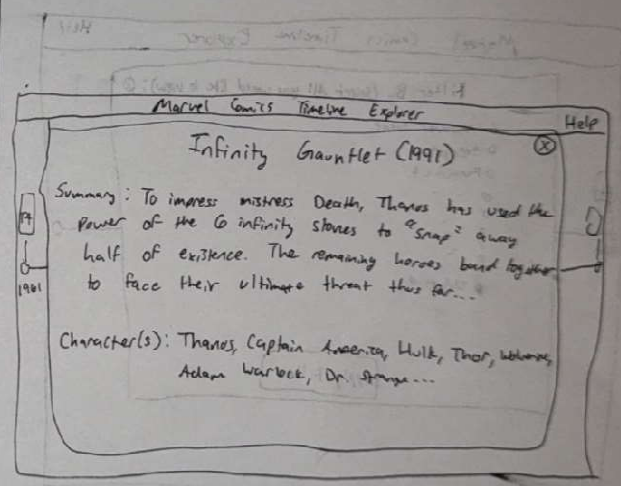

Below are my sketches, each corresponding to a storyboard:
